Tutorial 01

Crash Course on Video Editing *with Capcut*

Handout Notes

Today I'm going to introduce you to the basic features of *Capcut* by making an introduction video for this course. All source materials are produced with AI.

Visual Narrative

> Ragged mountaineers scale vertical, ice-slicked ridges amidst a blinding whiteout blizzard. A weathered sailboat pitches violently atop dark, churning swells under a heavy, charcoal sky. Exhausted silhouette trudge through shimmering heat-haze across undulating, endless orange sand dunes. Travelers emerge from the wilderness, converging onto a sprawling, brutalist concrete plaza surrounding a massive launch facility. The group ascend a metallic gantry, entering a colossal white spacecraft. A final close-up on the matte hull reveals the bold, black designation: CCAI 9012.

In this tutorial, you will learn how to:

- **Import materials** — *Import folders to keep things organized*
- **Zoom timeframe** — *Ctrl/Cmd + Scroll*
- **Split** — *Ctrl/Cmd + B*
- **Scale & positioning**
- **Screen ratio** — *Remember 9:16 portrait for this class*
- **Audio & Voice changing**
- **Track magnet** — *(Make sure your clips stay in place)*
- **Freeze**
- **Transitions & Effects**
- **Text**
- **Keyframes**
- **Export**
- **Compound Clip**

Happy Editing!
